

Micro Probe, Inc. Achieves ISO 9001:2000 Quality Certification

Gaithersburg, MD USA- (November 11, 2008) - Micro Probe, Inc., a leading developer and manufacturer of implantable neural microelectrodes and multi-channel arrays, announced today that it has successfully achieved ISO 9001:2000 certification (Certificate No. A2932US).

“ISO 9001 certification is representative of our core values because a practical Quality Management System empowers our employees to ultimately provide our customers with world-class products and service. This level of commitment to quality and continuous process improvement helps to define Micro Probe and differentiates us from all our competitors,” said Claudia Tsas, Manager of Quality Assurance at Micro Probe, Inc.

“As researchers throughout the life science community are increasingly requesting that their partners demonstrate a credible approach to quality, our ISO 9001:2000 certification is testimony to our ongoing commitment to excellence, and to our ability to efficiently support the advancement of clinical innovation,” added Martin Bak, CEO and Founder of Micro Probe Inc.

ISO 9001 is the internationally recognized standard for quality management and efficiency in business practices. Established by the International Organization for Standardization, the certification serves to ensure that customer and organizational needs are consistently met and are provided within a framework of continuous improvement.

The ISO 9001:2000 standard expands the criteria of previous certification versions, requiring organizations to adopt a "process approach" in the development, improvement, and implementation of their quality management systems. ISO 9001:2000 standard also places a strong emphasis on customer satisfaction, management responsibility, and organizational performance measurement.

About Micro Probe, Inc.:

Micro Probe, Inc., an ISO 9001:2000 registered firm, is a leading global provider of implantable neural microelectrodes and multi-channel arrays, and related systems. With over 25 years of experience in microelectrode design and fabrication, Micro Probe has the expertise to provide unparalleled technical support and customization for any application. Micro Probe boasts an extensive list of satisfied customers, ranging from university-affiliated and independent research facilities to Fortune 500 pharmaceutical and medical device companies.
